

Muhammad Hifzhan Silmi

SENIOR BACKEND ENGINEER

Backend Engineer specializing in scalable Laravel applications, backend architecture, API development, and production infrastructure.

Tangerang, Indonesia • +62 853 3106 6533 • akhdanhifzhan@gmail.com • linkedin.com/in/akhdanhifzhan • akhdanhifzhan.pages.dev

Professional Summary

Senior Backend Engineer with 4+ years of experience building scalable backend systems for government institutions, state-owned enterprises (BUMN), and private companies. Specialized in Laravel, REST APIs, Redis, queue processing, database optimization, and Linux VPS deployment. Experienced in designing enterprise applications, workflow automation, and production infrastructure.

Professional Experience

PT Agrinas Jaladri Nusantara (Persero)

Apr 2024 – Present
Senior Backend Engineer | Jakarta, Indonesia

- Led backend development for enterprise operational platforms supporting 40,441 registered users and 22,063 active applicants, delivering workflow automation across finance, HR, recruitment, project management, and internal business operations.
- Designed and implemented multi-level approval workflows covering financial requests, budgeting, and operational processes with status tracking, revision handling, and audit history.
- Built high-performance budgeting and financial planning modules featuring Excel-like editing, bulk import/export, automatic versioning, and payroll integration.
- Optimized production performance using Redis caching, database indexing, scheduled jobs, and integrations with Google Sheets, AWS S3, and WhatsApp APIs.
- Built executive dashboards and reporting systems to provide real-time operational insights for finance, HR, operations, and project management.

KusumaCorp

Apr 2025 – Present
Independent Backend Engineer

- Architected and developed a production-grade Event Management System using Laravel Filament for the 2026 PDS PA National Conference.
- Implemented QR attendance, participant registration, ID card distribution, goodie bag tracking, and operational dashboards supporting 807 participants.
- Integrated the official WhatsApp Business API and optimized system performance using Redis caching, queue workers, database indexing, Supervisor, and Linux VPS deployment to ensure reliable on-site operations.

Pusdatin Kementerian PUPR

Mar 2024 – Dec 2025
Backend Engineer (Contract) | Jakarta, Indonesia

- Developed backend services for the Computer Security Incident Response Team (CSIRT) platform using Laravel.
- Implemented secure role-based access control (RBAC) and authentication mechanisms for internal and public-facing users.
- Collaborated with analysts and stakeholders to translate cybersecurity workflows into maintainable backend solutions.

PT Mobility Doctor Indonesia

Mar 2023 – Sep 2023

Backend Developer | Jakarta, Indonesia

- Developed and maintained RESTful APIs using Laravel Lumen for an automotive service platform.
- Implemented RabbitMQ-based asynchronous processing to improve scalability, reliability, and background job execution.
- Collaborated with cross-functional teams to deliver backend services following PSR standards and microservices best practices.

Core Technologies

Backend	Laravel, PHP, Laravel Filament, Livewire, REST API
Architecture	Service Layer, Repository Pattern, DTO, RBAC
Database	MySQL, PostgreSQL, Redis
Infrastructure	Linux VPS, Nginx, Docker, Supervisor
Others	RabbitMQ, Git, TypeScript, React, FastAPI

Backend Engineer (Freelance)

PRIMO Operational Platform

2021 – Present

Personal Engineering Project

- Designed a modular Laravel platform consisting of 16+ reusable business modules supporting enterprise operational workflows.
- Implemented reusable Service Layer, Repository Pattern, DTO, RBAC, and generic CRUD architecture to improve maintainability and accelerate feature development.
- Built Excel-driven automation workflows to simplify enterprise operational processes and reduce repetitive administrative tasks.

Education

Politeknik Negeri Malang

2018 — 2022

Bachelor of Applied Informatics Engineering

GPA 3.63 / 4.00
