

MUHAMMAD HIFZHAN SILMI

Software Engineer

Tangerang, Indonesia • +62 853 3106 6533 • akhdanhifzhan@gmail.com • linkedin.com/in/akhdanhifzhan • akhdanhifzhan.pages.dev

PROFESSIONAL SUMMARY

Software Engineer with 5 years of experience designing and delivering business-critical software solutions, evolving from PHP Native web development into building scalable enterprise systems for government institutions, state-owned enterprises (BUMN), and private organizations. Experienced across the complete software development lifecycle—from requirement analysis and system design to deployment and production support—with strong expertise in backend engineering, workflow automation, RESTful APIs, distributed processing, and cloud-ready application architecture. Strong interest in distributed systems, software architecture, and building scalable backend applications.

PROFESSIONAL EXPERIENCE

Software Engineer (Staff IT – Application Developer) — PT Agrinas Jaladri Nusantara (Persero)

Apr 2024 – Present | Jakarta, Indonesia — Full-time, on-site

Delivered enterprise software supporting finance, HR, recruitment, budgeting, and project operations across multiple business divisions.

- Developed enterprise operational systems used daily by approximately **300 employees** across finance, HR, budgeting, procurement, and project operations.
- Built and maintained the company's e-Recruitment platform supporting **40,441 registered users** and **22,063 active applicants**, improving recruitment workflows through business process automation.
- Delivered executive dashboards providing real-time operational visibility across finance, HR, and project management.
- Improved application performance through Redis caching, database indexing, scheduled jobs, and backend optimization.
- Integrated enterprise applications with Google Sheets, AWS S3, WhatsApp API, and external business systems.
- Mentored internship developers while collaborating with business stakeholders throughout the software development lifecycle.

Software Engineer Consultant — Pusdatin, Kementerian Pekerjaan Umum

Contract Titles :

- Tenaga Pendukung Programming/Web Developer (Website CSIRT) (Mar 2024 – Dec 2024)

- Tenaga Ahli Sub Profesional Programmer Keamanan TI (July 2025 – Dec 2025)

Concurrent with full-time role at Agrinas | Hybrid — remote, with on-site progress reporting every 2–4 weeks

Developed secure government information systems supporting national cybersecurity initiatives.

- Developed backend services for the CSIRT platform using Laravel.
- Designed secure authentication, RBAC, and authorization workflows following government security standards.
- Collaborated with cross-functional stakeholders to deliver maintainable and secure software solutions.

Backend Developer — PT Mobility Doctor Indonesia

Mar 2023 – Sep 2023 | Jakarta, Indonesia — Full-time, on-site

Built backend services for an automotive technology platform.

- Developed RESTful APIs using Laravel Lumen within a microservices architecture.
- Implemented asynchronous processing using RabbitMQ to improve scalability and system responsiveness.
- Applied PSR-7 standards, service-oriented architecture, and backend best practices throughout the development lifecycle.

Independent Software Engineer — Freelance

Apr 2021 – Present

Delivering software solutions for educational institutions, SMEs, and private organizations through end-to-end software development.

Selected Projects

KusumaCorp – PT Kurnia Sukses Makmur

2025 – Present

Corporate Website & Event Management System

- Developed the KusumaCorp corporate website and a production Event Management System supporting **807** participants during the 2026 PDS PA National Conference.
- Built QR attendance, participant registration, operational dashboards, WhatsApp Business API integration, Redis caching, and Linux VPS deployment.
- Maintained reliable production performance throughout live event operations.

PRIMO Operational Platform

2026 – Present

Construction Project Monitoring Platform

- Architected a modular enterprise platform supporting project monitoring, budgeting, procurement, HR, inventory, reporting, and operational management.
- Implemented reusable backend architecture using Service Layer, Repository Pattern, DTO, RBAC, and Generic CRUD.
- Built Excel-driven workflow automation to streamline operational processes and reduce repetitive manual work.

Geosentric — Department of Geomatics, ITS

2021 – 2022

National Competition Platform

- Developed a web platform supporting approximately **1,000 participants** from senior high schools across Indonesia.
- Built landing pages, participant dashboards, and online examination modules using PHP Native, JavaScript, AJAX, jQuery, and MySQL.
- Managed production deployment using shared hosting infrastructure.

IT Infrastructure & Web Development Intern — PT Piramida Teknologi Informasi

Sep 2021 – Jun 2022 | Surabaya, Indonesia – Kampus Merdeka Internship Program, on-site.

- Assisted Linux server provisioning and deployment on dedicated servers.
- Learned Symfony framework, Linux administration, and production deployment practices.
- Supported internal web development initiatives while strengthening software engineering fundamentals.

CORE TECHNOLOGIES

Backend: Laravel, Laravel Filament, Laravel Lumen, REST API, Microservices, RabbitMQ, Redis

Architecture: Service Layer, Repository Pattern, RBAC, DTO, Queue Processing

Database: MySQL, PostgreSQL, Query Optimization, Database Design

Infrastructure: Linux, Docker, Nginx, Supervisor, AWS S3, Git, CI/CD

Frontend: React, TypeScript, JavaScript, Tailwind CSS

EDUCATION

Politeknik Negeri Malang

Bachelor of Applied Informatics Engineering | 2018 – 2022 | GPA 3.63 / 4.00
